

~~CONFIDENTIAL~~16th July, 1959.COCOM Document No. 3618 BCOORDINATING COMMITTEE

4287205

MEMORANDUM BY THE ITALIAN DELEGATIONEXPORT OF ZIRCONIUM OXIDE TO CZECHOSLOVAKIA

The Italian authorities have received a request concerning the export to Czechoslovakia of 3 kgs. of zirconium oxide 99%, covered by Item 13 on the Atomic Energy List, the total value of which is approximately \$ 19.

This product is to be delivered to Chemapol in Prague and will be used as an agent for chemical reactions in a laboratory.

The present request is submitted to the Committee within the framework of the exceptions procedure set up for minimum shipments (Annex A to COCOM 1473).

In view of the very limited quantity of the goods, which, moreover, have no strategic significance, the Italian authorities wish to grant the licence requested and would be glad if Member Governments would be good enough to make their views known by the 27th July 1959.
